

Creating, reviewing and approving clinical trial accountability logs

**IT IS THE RESPONSIBILITY OF ALL USERS OF THIS SOP TO ENSURE THAT
THE CORRECT VERSION IS BEING USED**

All staff should regularly check the R&D Unit's website and/or Q-Pulse for information relating to the implementation of new or revised versions. Staff must ensure that they are adequately trained in the new procedure and must make sure that all copies of superseded versions are promptly withdrawn from use unless notified otherwise by the SOP Controller.

The definitive versions of all R&D Unit SOPs appear online. If you are reading this in printed form check that the version number and date below is the most recent one as shown on the R&D Unit website: <https://www.research.yorkhospitals.nhs.uk/sops-and-guidance/> and/or Q-Pulse

SOP Reference:	Pharm/S103
Version Number:	3.0
Author:	Cheryl Donne
Implementation date of current version:	11 th August 2020

Approved by:	Name/Position:	Poppy Cottrell-Howe, Pharmacy Clinical Trials Manager
	Signature:	
	Date:	14 th July 2020
	Name/Position:	Sarah Sheath, SOP Controller
	Signature:	
	Date:	14 th July 2020

This SOP will normally be reviewed every 3 years unless changes to the legislation require otherwise

Version History Log

This area should detail the version history for this document. It should detail the key elements of the changes to the versions.

Version	Date Implemented	Details of significant changes
1.0	29 th May 2015	
2.0	10 th July 2017	Two year review. Minor changes
3.0	11 th August 2020	Change of link to R&D website. Change of author. Change of who can approve updated section about superseding old versions. Remove reference to Scarborough site.

UNCONTROLLED DOCUMENT WHEN PRINTED

1 Introduction, Background and Purpose

Accurate accountability is essential for clinical trials to enable a full audit trail to be created to document the receipt, dispensing, and return/destruction of Investigational Medicinal Products (IMPs). Recording details such as the batch number and expiry date of the products issued to participants is essential for ensuring IMP recall procedures can be followed.

Master accountability logs enable an accurate inventory of IMPs at site to be recorded; whilst participant specific accountability logs capture the details of all dispensing episodes and accountability activities relating to a specific participant. Accountability logs will be closely examined during monitoring, auditing and inspection visits.

This SOP describes the procedures to be followed when creating, reviewing and approving drug accountability logs for use in a clinical trial. The design of an accountability log and its subsequent completion should allow data to be recorded in a precise, clear and unambiguous way thus ensuring standardisation and consistency.

2 Who Should Use This SOP

This procedure should be followed by all members of the pharmacy clinical trials team at York and Scarborough Teaching Hospitals NHS Foundation Trust.

3 When this SOP Should be Used

This SOP should be used when creating, amending, reviewing and approving accountability logs to be used for a clinical trial.

4 Procedure(s)

4.1 Creating a master or participant specific drug accountability log

If a Sponsor has not provided a master or participant specific drug accountability log (and one is required), then create an accountability log using the relevant template. The following templates are available;

- Pharm/T36 (Template master accountability log (double blind trial))
- Pharm/T37 (Template master accountability log (open label trial))
- Pharm/T38 (Template participant specific accountability log)

Amend the templates accordingly to ensure they enable all information required to be captured for the specific trial. Follow section 4.3 for guidance on reviewing, approving and managing the documents.

4.2 Amending an accountability log provided by a Sponsor

If a Sponsor has provided an accountability log, this may be used if it captures all of the information required to enable full accountability is recorded. The following templates can be referred to for comparison;

- Pharm/T36 (Template master accountability log (double blind trial))
- Pharm/T37 (Template master accountability log (open label trial))
- Pharm/T38 (Template participant specific accountability log)

If the log needs to be amended to ensure all the necessary details are captured, then the CRA/Sponsor representative can be contacted to request that the accountability log can be amended. Alternatively create an accountability log using the above mentioned templates.

4.3 Accountability log review, approval and management

Accountability logs produced or amended by the pharmacy clinical trials team should be reviewed, and authorised prior to implementation.

A draft version of the accountability log should be created and given a version number (e.g. version 1.0). This should be sent to the pharmacy clinical trials pharmacist or pharmacy clinical trials manager for review. Any comments received should be incorporated if applicable.

The final version of the accountability log should be version controlled (see example below);

Version Number:	Supersedes Number:	Written by:
Date active:	Checked and authorised by:	

Once authorised, the accountability log should be scanned and saved electronically on the X drive, ensuring old versions are superseded. If required send a copy of the authorised accountability log to the CRA/Sponsor representative for approval, and print their approval email and file with the accountability log in the Pharmacy site file in the relevant section. Ensure the relevant members of staff have signed the master copy of the accountability log; laminate the master copy and place in the relevant section in the PSF ensuring old versions are superseded.

When processing an amendment that requires a change to the accountability log, amend the previous version using track-changes - do not replace or save over the previous version save it as a new document. Ensure it is checked and authorised as explained above. All previous versions of the log must be superseded electronically and in the Pharmacy site file.
